## 19" Cabinets

*The Internap® colocation product offering begins with 19" colocation cabinets. Internap cabinets provide a highly secure storage environment while simultaneously ensuring collocated equipment receives the necessary airflow required to provide adequate cooling. With a number of available options, an Internap colocation cabinet is the perfect solution for small and growing equipment installations.*

### Our colocation cabinet features include:

#### Mechanical

- Nominal exterior dimensions: 24"w x 42"d x 84"h
- Interior dimensions:  
Cabinets feature a usable depth of 38"
- 44U of usable space (1U is 1.75 inches)
- Two pairs of 19" square holed mounting rails
- Floor-bolted (seismic mounting, where appropriate) – assume approximately 24 square feet of floor space per each cabinet when mounted in a Private Cage
- Key-operated front and back doors
- Perforated door panels

#### Power (sold separately; not included in cabinet pricing)

- Standard offering is one (1) 20A 120V conditioned and grounded primary power feed per each cabinet
- Redundant or additional primary power circuits (subject to facility power guidelines)
- 20/30A AC increments
- 110/208/220V AC (where available)
- 48V DC (where available)
- Internap provides one (1) 10-outlet AC power strip twist-locked per 20A 120V power feed
- Delivery via overhead cable trays or under floor conduit

#### Network

- One (1) patch panel where required by facility policy for cross-connect terminations
