## 4-Post Server Rack

The Internap® colocation private cage product offering begins with 4-post colocation server racks. Internap uses Chatsworth Products 4-Post QuadraRack™ ServerFrame which provides a highly secure storage environment while simultaneously ensuring collocated equipment receives the airflow required to provide adequate cooling. With a number of available options, our server rack is the perfect solution for customers needing to maximize airflow for today's power-intensive equipment installations.

### The QuadraRack Server Frame Specifications

- Exterior dimensions: 19"w x 29"d x 84"h
- Interior dimensions: usable depth of 29" x width of 17.79"
- 45U of usable space (1U is 1.75 inches)
- Square holed mounting rails
- Floor-bolted (seismic mounting, where appropriate) – assume approximately 24 square feet of floor space per each rack mounted in a private cage
- 1,000 pound load capacity

### Power Options

- Power configurations available in 120/208/220V or 3-phase
- Fully-redundant power circuits
- 48V DC power (where available)
- Internap provides one (1) 10-outlet AC power strip per 20A/120V power feed
- Vertical or horizontal power strip mounting

### QuadraRack Options

- Rear equipment support brackets (for equipment shallower than 29" deep)
- Rack shelf
- Sliding keyboard/mouse tray
- Additional power strips

### Service Options

- Managed Installation Service
- Remote Hands On-Demand Service
- Technical Support Service
- Tape Exchange Service
- Shipping and Receiving of Equipment

### Cross-Connect Options

- POTS
- T1
- DS3/COAX
- Copper (Ethernet)
