

Tailored Solutions to Fit Your Business

Business is growing, but technical staff is spread too thin with the day-to-day responsibilities involved in managing your IT Infrastructure. The daily burden of infrastructure management is becoming distracting, resources are stretched to a breaking point and your organization's ability to focus on its core strategic objectives is diminishing.

The Internap Solution

Our Managed Hosting solution allows you to transfer the time-consuming responsibilities of managing IT Infrastructure to a best-in-class managed services provider. As a result, your organization can focus on the activities that offer the greatest value to your business, while reducing capital investments in new hardware. Our solution enhances your end-user experience, improves customer stickiness and increases customer satisfaction.

The Internap Difference

Our Managed Hosting solution delivers the performance, flexibility and support that your business-critical applications require. Whether it is supporting a small dedicated server platform for a single project or managing a large-scale virtualized environment, you can trust us to meet your IT Infrastructure needs.

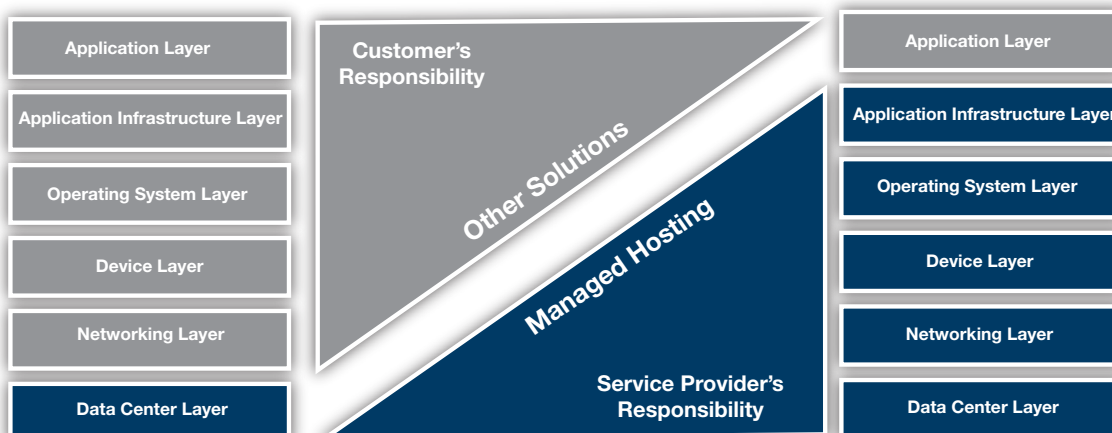

Our expertise in designing and managing custom technology solutions helps solve unique business challenges, tailored to your needs. Our enterprise-class hardware and fully-redundant data centers employ a multi-layered security approach and provide SAS 70 Type II compliant processes.

Our managed hosting solution is powered by our patented Managed Internet Route Optimizer™ (MIRO) technology and Performance IP™, which outperforms any single high-speed Internet access provider for maximum reliability and uptime. By leveraging our broad suite of IT Infrastructure services, including public and private cloud and our route-optimized Content Delivery Network (CDN), Internap gives you complete platform flexibility for your needs today and beyond.

Managed Hosting Benefits

- No hardware or operating system purchases free you from up-front capital expenses while eliminated maintenance costs give you the ability to focus on delivering more impact and benefit to your core business.
- Tailored solutions meet your specific requirements and are provided by regional sales force experts.
- 24/7 technical support and security staff proactively monitors your network from our geographically dispersed, redundant Network Operations Centers.
- Industry-leading Service Level Agreement supports 100% uptime, eliminating lost revenue due to network connectivity or performance issues.

A managed hosting solution provides more levels of management than other data center solutions, freeing you from capital expenses and maintenance costs.

Contact us to learn how Internap can solve your IT challenges by enabling you to focus on your core business, improve service levels and lower the cost of IT operations.

Managed Hosting Features

Managed Storage. Our Managed Storage solutions offer you access to on-demand, worry-free storage with no up-front investment and no need for dedicated expert resources. These scalable solutions include enterprise-grade Direct Attached Storage, Network Attached Storage and Storage Area Network products, based on your business needs.

Managed Services Operations Center (MSOC). Our premium MSOC leverages a Virtual Private Management Gateway (VPMG), allowing remote monitoring and access to customer solutions. The VPMG ensures all remote connections to customer environments are encrypted and provides an additional level of authentication, logs and records all activity performed for later playback or auditing.

Managed Data Protection. Our Managed Data Protection solution gives you the comfort of knowing that the integrity of your digital assets is maintained. We manage data protection and remove the worry of managing backups, with no prepaid storage allocation or overages, allowing you to focus on your core business.

Private and Public Cloud. Our private cloud solutions, built on VMware®, provide the flexibility, efficiency and scalability of cloud computing in a dedicated, secure environment. Create your own virtualized environment on your dedicated infrastructure and leverage the benefits of cloud without the security and performance concerns of being on a shared platform with other users. Our Cloud Storage solution offers unlimited storage capacity, on-demand access and utility billing, giving you the flexibility you need to do business your way.

Private Network Access Point (P-NAP®). Our Managed Hosting facilities offer access to most major backbone carriers via our P-NAP architecture. Since access to the major carriers is inherent in our data center design, redundancy and network uptime are supported.

Additional Network-Based Acceleration Services. We offer additional performance technologies and solutions, including our CDN and TCP acceleration service, known as Accelerated IP. These services provide you with the very best in acceleration and content delivery technology performing over our highly available, high-performance network infrastructure. These technologies overcome the distance limitations of the Internet and associated latency. We also offer managed load balancers, managed firewalls and a range of virtualization options.

Managed Hosting

Why Internap?

Transform your IT infrastructure into a competitive advantage with IT IQ from Internap, intelligent IT Infrastructure solutions that deliver unparalleled performance, flexibility and support. Since 1996, thousands of enterprises have entrusted Internap to deliver their online applications across our platform of connectivity, colocation, managed hosting and cloud services.
