

# managed hosting

## Managed Storage

*Storage is an integral part of your IT infrastructure, with every application requiring access to data and some form of data management. Internap's Managed Storage solution offers enterprises access to on-demand, worry-free storage with no upfront investment and no need for dedicated expert resources.*

### The Solution

Internap Managed Storage is a fully-managed solution for enterprises with a need for file or database storage. The solution is available exclusively in Internap data center facilities and allows addition of storage capability to an enterprise IT operation at a reasonable cost.

### Key Benefits

**Simple** – Turnkey implementation. Easily integrates with other Internap managed hosting products.

**Scalable** – Flexes to fit your application needs. Adjusts to fit changes in your business requirements.

**Affordable** – Competitive flat rate pricing based on storage size, performance level and features.

**Reliable** – Managed 24/7 by a team of highly qualified experts utilizing best practices. Customers do not have to worry about the spare parts, maintenance, troubleshooting and monitoring.

**Optimized** – Optimized for operational efficiency, performance, and availability.

### Minimizes Total Cost of Ownership

**(TCO)** – Deploy storage more cost-effectively than the alternative approach requiring capital investment in and ongoing operating expenses for enterprise owned storage.

### Service Description

Professional management of your storage assets including:

- Architecting a storage solution to fit your business needs
- Installation of your dedicated storage solution
- Configuration of your storage solution based on your business needs and application requirements
- Ongoing management and monitoring including maintenance and repairs – leveraging procedures based on best practices

### Features

- Dedicated storage assigned to each customer
- Scalable to 420TB per customer
- High availability for business-critical applications
