

Dallas Data Center

INTERNAP[®]

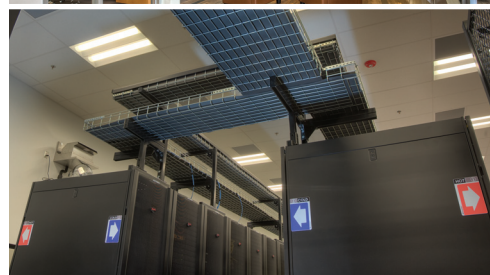

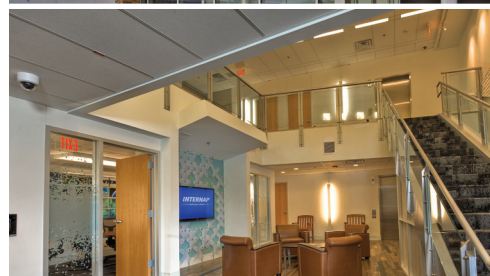

IT | IQ

**1221 Coit Road
Plano, TX 75075**

Internap's premium data center in Dallas, TX offers a superior modular design allowing for increased reliability and enhanced flexibility. State-of-the-art technology provides for high density power and high efficiency cooling options, while advanced security and protection features ensure your data is secure 100% of the time. With tech rooms, customer lounges, conference rooms, storage areas and offices, you have the flexibility to do business your way.

Internap's Dallas, Texas facility offers:

- **Location:** Located in the heart of the Texas hi-tech Silicon Prairie, Internap's Dallas facility is adjacent to many Fortune 500 companies and offers convenient access to highways, airports and hotels.
- **Same Footprint. More Power:** Our Dallas facility features the latest in data center design techniques including in-row cooling options and close coupled liquid cooling solutions enabling high density configurations of up to 12KW per rack—among the highest in the industry.
- **Green Design:** As a part of our overall design philosophy, we are committed to consuming fewer fossil fuels, reducing greenhouse emissions, minimizing the impact on land and providing a better working environment.
- **Speed-to-Market:** By integrating modular elements into our facility design, we can grow as quickly as your business demands.
- **Carrier Diversity:** Our Dallas facility offers a robust carrier-neutral Meet-Me Room, including alternative transit and local access options. In addition, we also provide Internap's Performance IP™ with optimized links up to 10GB through more than 10 top tier carriers.
- **Customer Amenities:** Our data centers are more than just a place to house equipment; every facility features fully equipped office space and technical workspace, plus a full service lounge with DIRECTV, X-Box and multiple vending options for snacks and beverages.
- **On-Site Personnel:** Our experienced team of data center engineers and technical support staff are on-site 24/7, proactively monitoring facility performance and resolving issues before they impact your business.
- **Resiliency:** More than just an N+1, our infrastructure system is designed for the concurrent maintainability of generator, UPS and cooling modules, enabling our Dallas facility to maximize the uptime of your environment.
- **Security:** We protect your equipment with comprehensive security measures including 24/7 on-site security personnel, closed circuit television systems, as well as biometric, electronic and key card locks.
